

Post-Class 4 Assignment

Consider the characteristics of a lecture that make it effective.

Due: Session 5

This assignment is an extension of the In-Class Exercise that we did in class today.

The outline should be detailed enough for you to use in the delivery and/or development or your lecture notes for your chosen topic.

- Identify a topic from the course you have been working on (PLEASE use the course for which you wrote your ILOs from Class 3 - DO NOT use the examples from last class).
- Make sure the ILO(s) for that topic are well articulated
- Choose a structure, and other elements that support your learning outcomes
- Draft a rough outline the class in which you would present that topic.

Please reflect on and articulate why you have chosen the structure that you did, i.e., explain how the structure supports student learning of the topic.
